DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02-20-04 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5,10,11, and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. In claims 5, 11, and 12, the use of " and/or" makes it difficult to identify which combinations of elements are coupled together at any one time to the further cascode transistor...

In claim 5, lines 4 and 6, " the first intermediate transistor" lacks antecedent basis.

In claim 10, line 4, and claim 12, line 4, " the first intermediate transistor" lacks antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2817

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1,6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Quigley et al(US 5,825,640 new cite)

The reference by Quigley et al discloses a charge pump for an electronic PLL with cascode output(Ip), see figures 2 and 3, that is used ^{an} ~~in a~~ an electronic PLL circuit which is part of a semiconductor device(I.C. see background in col. 1, .

The charge pump comprises cascode transistors(33,34), and intermediate switches(36,37). Note transistor (32) has a drain node and intermediate switch(37) is between the drain node and the cascode transistor(33).

Allowable Subject Matter

2. Claims 3,4are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claims 5, 10, 11 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

4. Claims 8,9 allowed. The examiner could not find fair suggestion for the dummy branch with second cascode transistor(see cl. 8), nor... the intermediate switch transistor between one of the first node and the second node, and one of the first cascode transistor and the second cascode transistor coupled across from one of the first switch transistor and the second switch transistor...(see cl. 2)
